PROUDLY MADE IN ITALY

ROBOSPRAY TWIN

With N. 1 Anthropomorphic Arm and an Oscillating Arm

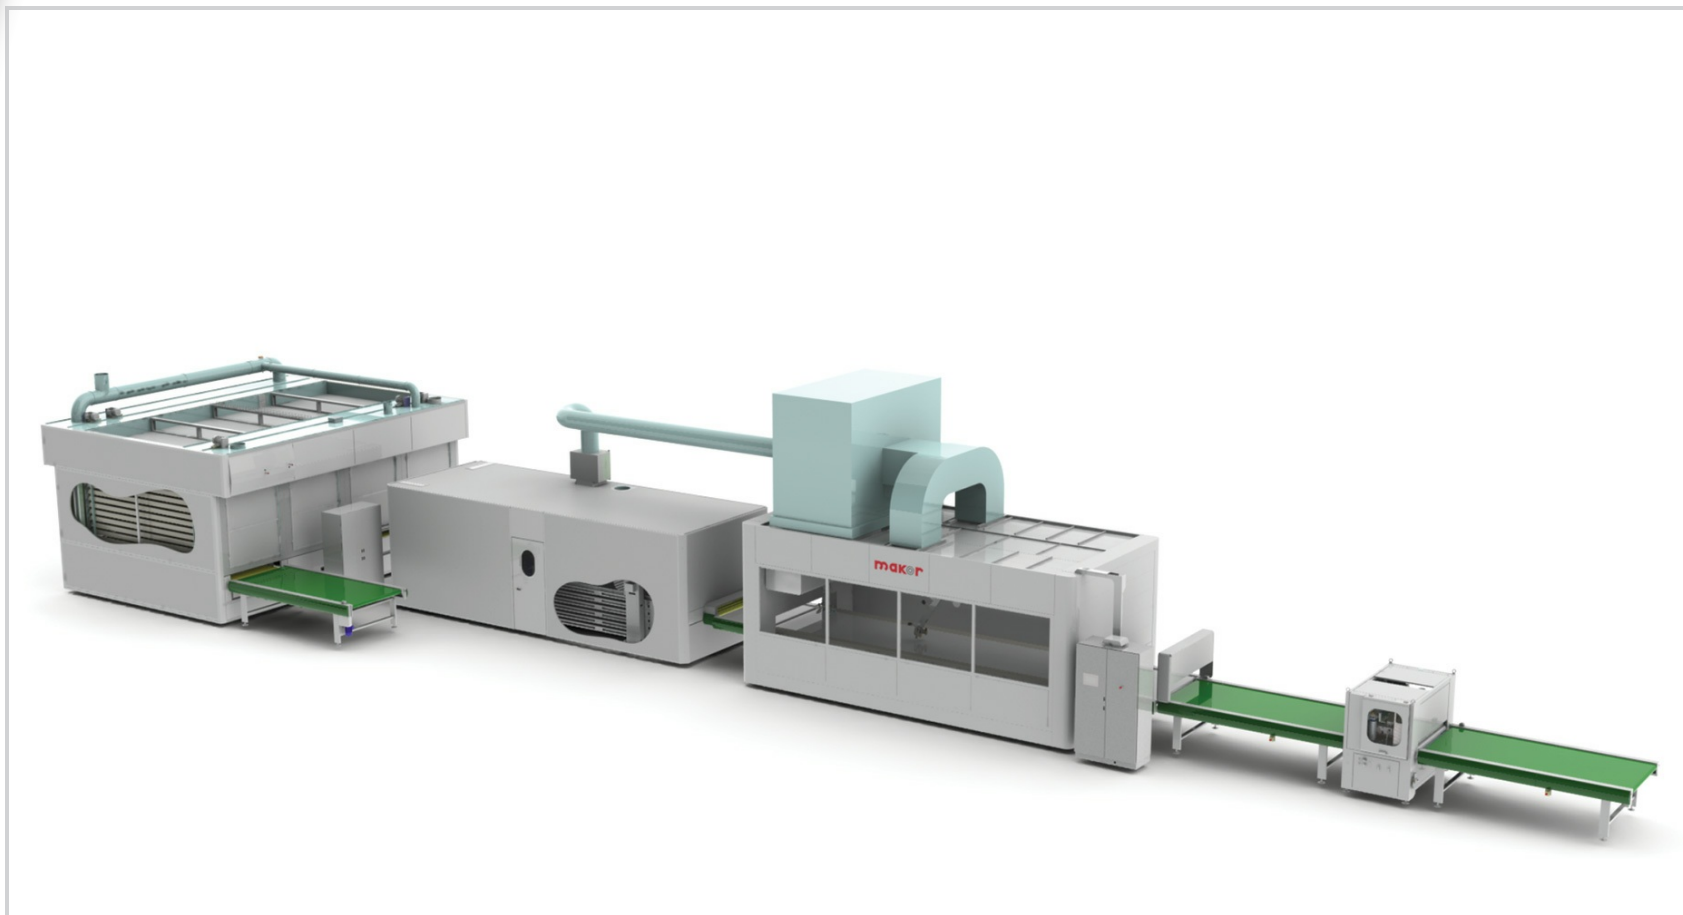

High quality, high productivity

- The latest evolution of spraying machines. With
- ROBOSPRAY, Makor has redefined the standard of
- painting robots.
- Ideal for painting flat and 3d elements with high
- application qualities, thanks to the use of an
- anthropomorphic arm where a paint head is mounted.
- In the Twin version, an oscillating unit at the outfeed of the machine is added to increase its productivity.

Available with paper and self-cleaning belt for continuous operation up to 6 mt / min and stop and go mode.

The innovative 3d reading system, provides sizes and shapes of the pieces to be painted, for a simple and fast machine use

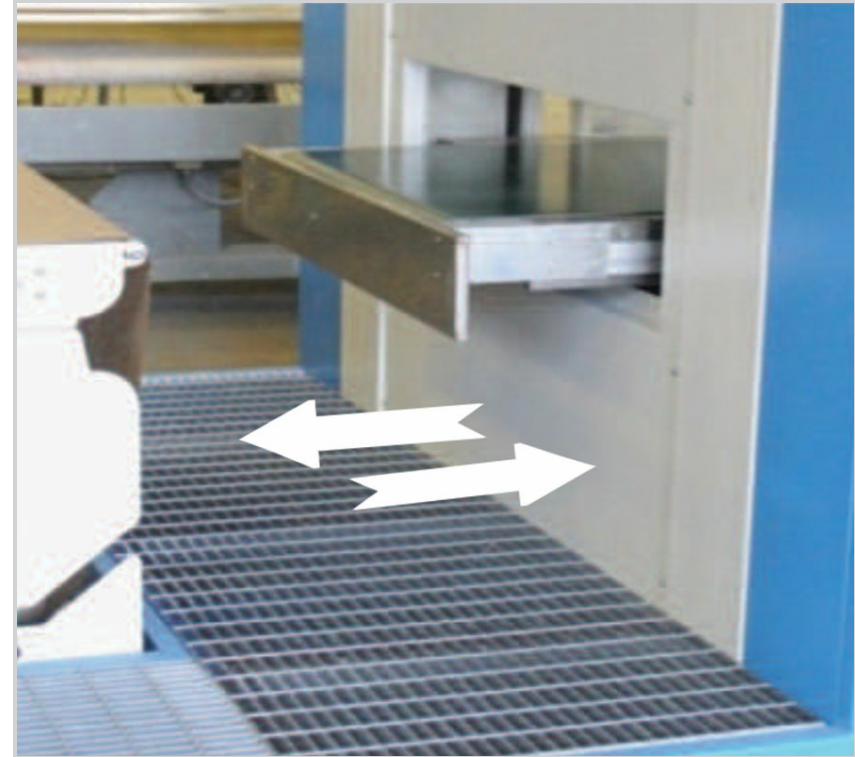

- ✓ Suitable for high quality and large production volumes for flat and 3D pieces up to 300 mm height
- ✓ Twin version with 1 anthropomorphic arm and 1 oscillating arm.
- ✓ Spraying head with 3 guns: 2 for flat parts and 1 for the edge.
Option: spraying head with 4 guns
- ✓ Wide filtering surface, positioned on the floor
- ✓ Automatic pressurization control and balancing
- ✓ Available the version with paper and self-cleaning belt for continuous operation
- ✓ Cleaning brush and quick discharge of product
- ✓ Automatic change of head (option)
- ✓ High precision 3D reading system
- ✓ Wide painting programs
- ✓ 15 "touch screen control panel
- ✓ CAD CAM System (option)

EXAMPLE OF LINE FOR GLOSS

Uniform air flow Floor level suction/filtering
