Radial arm saw

# HARWI MULTIMATIC

## Radial arm saw

### HARWI MULTIMATIC

The **Multimatic** has been **specifically** developed for **processing** industrial-sized insulation panels with a top layer of aluminum or steel. The machine can be loaded from the **front** because of its **open C-frame**.

The strong clamping and the adjustable automatic sawing movement ensures a safe and **ergonomic working method**.

The sawing machine can be complemented with heavy roller conveyors **manufactured by Harwi**.

The conveyors can be equipped with a **manual or digital** length measuring system.

The **Multimatic** is only available in the **Pro version**.

Sawing **insulation panels** has never been easier. The **Multimatic** is a time saving machine, it improves the safety of the operator, a high **quality** cut and ensures **a fast return of investment**.

# Harwi MultiMatic

The **Harwi Multimatic** is the most powerful and complete radial saw in our range. This industrial radial saw has been specially developed for processing industrial-sized boards of insulation material with a top layer of aluminium or steel, but is also highly suitable for processing wood.

## **Harwi Multimatic front loader**

Just like the Harwi 625-H-2K, the Multimatic is a radial saw for industrial-sized boards of up to 1250 mm. Its unique open C-frame structure makes the Harwi Multimatic easy to load from the front. This radial saw can be used to cross-cut industrial insulation boards in an ergonomic and user-friendly manner.

## **Standard pneumatic clamping and two-hand controls.**

The standard pneumatic clamping system on both sides of the saw ensures that the boards remain in place while cutting.

The two-hand controls make radial cutting with the Harwi Multimatic very safe and completely ergonomic for your operators.

## **Harwi 1250 roller conveyors**

This radial saw can be expanded as desired by means of Harwi 1250 roller conveyors, one side of which can be equipped with a manual or automatic length measuring system. By opting for the complete concept, the handling of the panels during supply and removal is also taken care of in addition to sawing.

Are you interested in a demonstration of the Harwi Multimatic, the Harwi 1250-H-2K or one of our other radial sawing machines? Please contact us.

We will be happy to help you put together a suitable solution for your sawing process.

# Specifications

| Type                     | Harwi MultiMatic         |
|--------------------------|--------------------------|
| Height of cut (tixed)    | 210 mm                   |
| Length of cut            | 1250 mm                  |
| Diameter saw blade       | Ø 600 mm                 |
| Saw blade bore           | Ø 40 mm                  |
| Motor power              | 5 kW (7 pk)              |
| Voltage                  | 400V / 3~                |
| Air pressure clamping    | 3 bar                    |
| Spindle speed adjustable | Yes, 900 - 1900 omw/min  |
| Diameter dus extraction  | 1x Ø 120 mm / 1x Ø 80 mm |
| Weight                   | ± 1150 kg                |
|                          |                          |
|                          |                          |
|                          |                          |

## Specifications

|                                        | Harwi MultiMatic |

## Our mission

Through combining experience and craftsmanship with service and development, we strive for an optimal working environment in which safety, ergonomics and health come first.

The robust nature and the long service life of our machines characterize our passion for technology. Our core business is the delivery of standard sawing solutions in the wood industry.

However we also use our expertise and knowledge to aid our customers in process specific sawing solutions.

## Our company

Harwi has been producing its sustainable sawing machines in Helmond in Brabant since 1960. Our specialization and expertise in the wood industry in particular has been ensuring satisfied customers for years.

Providing innovative sawing solutions within the Netherlands and abroad is the foundation of our organization. Within this foundation we prioritize user friendliness and quality.
